

Thursday 14th May- Science: Climate Change

Think about what you know about climate change already- if you can do any further research about it then go for it!

Now I want you to write a persuasive letter to the Prime Minister about how you think he could help to improve things and save our planet.

Remember to persuade you need to give a clear argument with reasons as to why you think things (don't just say you need to do something without any support)

Other things that you need to remember:

- Full stops and capital letters
- Neat handwriting
- Paragraphs
- Conjunctions
