

## Thursday 30<sup>th</sup> April – Geography Task

Look at the photos of landscapes. Identify which features have been made by humans (human features) and which are natural (physical features). How does human activity change how the land looks? Can there be both human and physical features in a landscape?

Label the human and physical features on the pictures below.

Sort the images below into a table with the headings 'human and physical features' using the example below.

**Human Features**

**Physical Features**

1. Big Ben and the Houses of Parliament, London

2. The Angel of the North, Gateshead

3. Durdle Door on the Jurassic Coast, Dorset

4. Wembley Stadium, London

5. Ben Nevis (the highest mountain in the UK)

6. Forest of Dean, Gloucestershire

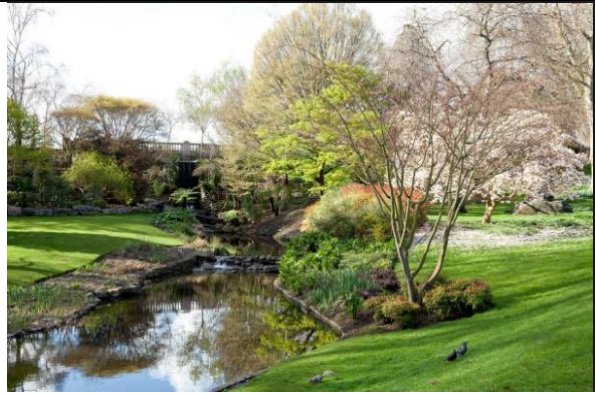

7. Clifton suspension bridge, Bristol

8. River Severn (the longest river in the UK)

9. The White Cliffs of Dover

10. Hyde Park, London

Can you think of your own examples of human and physical features?
