# Year 5/6 Maths Booklet 5 

Steps to Success

## Teacher Led

## https://www.youtube.com/watch?v=5Ni53wpVO2I

The radius goes from the edge of the circle to the centre point
The diameter goes from one edge to the other and passes through the centre point.
The diameter is twice the size of the radius. It can be written as $D=2 r$

## My turn

If I know the radius of the circle is 5 mm long.
a.

$D=2 r$
D $=2 \times 5$
$D=10 \mathrm{~mm}$
b.

If I know the diameter of the circle is 12 cm long.
$D=2 r$
I know I need to half the diameter to get the radius.
$12 / 2=6$
$D=6 \mathrm{~cm}$

## Your turn

d.

e.

Drawing circles with a compass
You always set your compass to the size of the radius
https://www.youtube.com/watch? $\mathrm{v}=02 \mathrm{XRad7s1I} \mathrm{\sigma}$

n. John has a round swimming pool. The distance from the center of the pool to the edge is 3 meters. What is the diameter of John's pool?
answer: $\qquad$
Q1. Four large circles and five small circles fit exactly inside this rectangle.

Not actual size
The diameter of a large circle is $\mathbf{1 7 . 5}$ centimetres.
Calculate the diameter of a small circle.

## Q1. The diagram shows a right-angled triangle inside a circle.

The circle has a radius of 5 centimetres.

Calculate the area of the triangle.

Draw a circle with a radius of 5 cm

Draw a circle with a radius of 6 cm

Draw a circle with a radius of 4.5 cm

Draw a circle with a diameter of 14 cm

Draw a circle with a diameter of 15 cm

| :--- |
| Explain tetSpot the mistake! <br> Ross has measured and labelled the <br> diameter of the circle below. <br> He thinks that the radius of this circle will <br> be 3.5 cm. |
| Is Ross right? Explain why. |
| Further Challenge |

Harry had a circle which was marked with twelve numbered dots to help him draw clock faces. The circle had a diameter of 10 cm .

Harry drew lines from the 12 to the 3, from the 3 to the 6, from the 6 to the 9, and then back from the 9 to the 12.

What shape had he drawn?
Find the area of the shape.
Harry had lots of centimetre square tiles.

He covered as much of his shape as he could with whole tiles without going over the edge.
What was the largest number of whote tiles he could fit in?

## Fluency Answers

radius $=11 \mathrm{~m}$
diameter $=22 \mathrm{~m}$
i.

radius $=9 \mathrm{~km}$
diameter $=18 \mathrm{~km}$
f.

radius $=15 \mathrm{~mm}$

h.

radius $=7 \mathrm{~cm}$
diameter $=14 \mathrm{~cm}$
I.

radius $=25 \mathrm{~mm}$
diameter $=\underline{50 ~ m m}$
n. John has a round swimming pool. The distance from the center of the pool to the edge is 3 meters. What is the diameter of John's pool?

M1. Award TWO marks for the correct answer of 14
If the answer is incorrect, award ONE mark for evidence of appropriate method, eg
$17.5 \times 4=70$
$70 \div 5$
Accept for ONE mark 140 OR 1.4 as evidence of appropriate method.
Answer need not be obtained for the award of ONE mark.
M1. (a) 12.5 OR $121 / 2$
(b) Award TWO marks for the correct answer in the range of 66 to 66.1 inclusive OR an answer based upon values obtained in 13a.

If the answer is incorrect award ONE mark for evidence of an appropriate method, eg

- $(3.14 \times 5 \times 5)-12.5$

The calculation need not be completed for the award of the mark.

$$
\text { Up to } 2
$$

## Problem solving and reasoning answers

Ross isn't correct because the line does not go through the centre of the circle. Diameter has to go from one edge to another and pass through the centre point. The radius goes from the edge of the circle to the centre point.

## Teacher Led

A pie chart represents a total split up into parts, these might also be represented as fractions or percentages.
I can see that the pie chart below has been split into two halves. So each half is worth 300.
If $\mathbf{6 0 0}$ children were inferviewed and their favourite colours were represented by the pie chart below, how many said blue was their favourite colour? And red?

I can see that the pie chart below has been split into $1 / 4$ (green) and 3/4 (yellow).
If the total is 800
$1 / 4$ of 800 is 800 divided by $4=200$
Green $=200$ children
$3 / 4$ of 800 is 800 divided by $4=200 \times 3=600$
Yellow = 600
To know I've done it correctly, I can add my two parts up and check they make a whole.
$600+200=800$
If $\mathbf{8 0 0}$ children were interviewed and their favourite
colours were represented by the pie chart below, how
many said green was their favourite colour? Yellow?

## Your turn

Think about what fractions you can see and work our the amount for each animal.

This pie chart represents 40 children.

## My turn

250 people were asked what their favorite type of show is to watch on TV. How many people responded that they prefer to watch sports or documentaries?

Sports $=35 \%$
$100 \%=250$
$10 \%=25$
$5 \%=12.5$
$30 \%=75$
$35 \%=87.5$

## Fluency

This pie chart represents 400 children.

This pie chart represents 80 children.

Apple

## Orange

## Pear

## Banana

Mango

## Pineapple

This pie chart represents 112 children.

## Favourite Ice Cream Flavours

$\square$ chocolate $\square$ vanilla
 strawberry

1. 50 people were asked about their favourite ice cream flavour. Use this information to answer these questions about the pie chart:

Boys and Girls in Year 5

## Boys and Girls in Year 6

2. These pie charts show the number of boys and girls in a school in Year 5 and Year 6. There are 50 children in Year 5 and 60 children in Year 6.

## Favourite Zoo Animals

1. 200 people were asked about their favourite zoo animal. Use this information to answer

The Make-up of an
Audience at an Afternoon Performance at a Theatre

$\square$ adults $\square$ seniors

$\square$ children

The Make-up of an Audience at an Evening Performance at a Theatre

200 people went to the theatre one afternoon. The same evening, 500 people went to the same theatre. Answer the following questions about the pie chart

Average Attendance at
Football Grounds

1. This pie chart shows the average attendance over a season. Rovers' average attendance was 50000 . Answer these questions about the pie chart:

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Steps to Success

If there are 300 children in the school and 75 of them had 2 siblings. How many degrees would this be in a pie chart?

## Teacher Led

## 1. Collect or identify your data

Imagine you have collected the following data about the eye colour of 60 people and you want to turn it into a pie chart:

| Eye Colour | Number of People |
| :--- | :--- |
| Green | 22 |
| Blue | 13 |
| Brown | 17 |
| Other | 8 |
| Total | 60 |

## 2. Understand the process

A circle is a full turn of $360^{\circ}$.
To find out how big each section of the pie chart needs to be, we need to find out how many degrees each datum represents.

## 3. Convert the data to degrees

| Eye Colour | Number of People |
| :--- | :--- |
| Green | 22 |
| Blue | 13 |
| Brown | 17 |
| Other | 8 |
| Total | 60 |

Divide 360 by the total size of your sample to calculate how many degrees each datum the eye colour of each person) is equal to.
$360 \div 60=6^{\circ}$ per person.

Multiply the number of people in each data set by 6 to calculate the size of the angle for their sector in the pie chart.

| Eye Colour | Number of <br> People | Calculation | Degrees in <br> Pie Chart |
| :--- | :--- | :--- | :--- |
| Green | 22 | $22 \times 6$ | 132 |
| Blue | 13 | $13 \times 6$ | 78 |
| Brown | 17 | $17 \times 6$ | 102 |
| Other | 8 | $8 \times 6$ | 48 |
| Total | 60 | $60 \times 6$ | 360 |

## 4. Drawing your pie chart

1. Draw a circle.
2. Mark the radius by joining the centre of the circle to the edge.
3. Place a protractor on the radius and measure the angle for your first data 'slice'.
4. Draw the line in to complete the sector.
5. Repeat for your remaining data.

6. You should find that you don't need to measure your last sector!

## 5. Label and colour your chart

Pie Chart to Show the Eye Colour of 60 People

| Cow | 15 |  |
| :--- | :--- | :--- |
| Hen | 12 |  |
| Pig | 5 |  |
| Sheep | 28 |  |
|  | 60 | 360 |

Favourite sport

| Hot chocolate | 20 |  |
| :--- | :--- | :--- |
| Soup | 15 |  |
| Coffee | 35 |  |
| Tea | 30 |  |
|  | 100 | 360 |

4 Favourite subject

| Maths | 304 |  |
| :--- | :--- | :--- |
| English | 224 |  |
| Art | 138 |  |
| Science | 54 |  |
|  | 720 | 360 |

Questions - Use the tables provided to calculate the size of each section of the pie chart then draw it on the circle provided:
1)

| Favourite <br> football team | Number of <br> people | Size of <br> angle |
| :--- | :--- | :--- |
| Forest | 10 |  |
| Derby | 8 |  |
| County | 3 |  |
| West Bram | 15 |  |
| TOTALS |  |  |

2)

| Favourite <br> Food | Number of <br> people | Size of <br> angle |
| :--- | :--- | :--- |
| Sunday <br> Dinner | 3 |  |
| Fast Food | 10 |  |
| Soup | 1 |  |
| Fish Fingers | 6 |  |
| TOTALS |  |  |

3)

1

| Favourite <br> Lesson | Number of <br> people | Size of <br> angle |

## Problem Solving and Reasoning

| Use it |
| :--- |
| $\qquad$A survey was conducted to work out Year <br> 6's favourite sport. Work out the missing <br> information and then construct a pie chart. <br> Favourite <br> Sport |
| $\qquad$Number of <br> Children |
| Football |
| Tennis |
| Rugby |
| Denvert to |
| Swimming |
| Cricket |
| Golf |
| Total |

Further Challenge

The pie chart shows the ingredients needed to make a breakfast cereal. 120 grams of almonds are used.

Estimate the quantity of each of the other ingredients.

Explain how you know

1. Cow $=90$ degrees, Hen $=72$ degrees, $\mathrm{Pig}=30$ degrees, Sheep $=168$ degrees
2. Hot chocolate $=72$ degrees, Soup $=54$ degrees, Coffee $=126$ degrees,

$$
\text { Tea }=108 \text { degrees }
$$

3. Rugby $=108$ degrees, Football $=156$ degrees, Cricket $=72$ degrees,

Basketball $=24$ degrees.
4. Maths $=152$ degrees, English 112 degrees, Art $=69$ degrees, Science $=27$ degrees

Problem Solving and Reasoning
1)

| Favourite <br> football team | Number of <br> people | Size of angle |
| :--- | :--- | :--- |
| Forest | 10 | 100 |
| Derby | 8 | 80 |
| County | 3 | 30 |
| West Brom | 15 | 150 |
| TOTALS | 36 |  |

2) 

| Favourite Food | Number of <br> people | Size of angle |
| :--- | :--- | :--- |
| Sunday Dinner | 3 | 54 |
| Fast Food | 10 | 180 |
| Soup | 1 | 18 |
| Fish Fingers | 6 | 108 |
| TOTALS | 20 |  |

3) 

| Favourite <br> Lesson | Number of <br> people | Size of angle |
| :--- | :--- | :--- |
| Art | 3 | 36 |
| Drama | 4 | 48 |
| PE | 15 | 180 |
| English | 4 | 48 |
| Maths | 4 | 48 |
| TOTALS | 30 |  |

Children will then use this to draw a pie chart.

| Favcurtte Sport | Number of Children | Corver to Degrees |
| :---: | :---: | :---: |
| Football | 10 | $10 \times 6=60^{\circ}$ |
| Tennis | 18 | $18 \times 6=108^{\circ}$ |
| Rugby | 15 | $15 \times 6=90^{\circ}$ |
| Swimming | 6 | $6 \times 6=36^{\circ}$ |
| Cricket | 7 | $7 \times 6=42^{\circ}$ |
| Golf | 4 | $4 \times 6=24^{\circ}$ |
| Total | 60 | $360^{\circ}$ |
| Dinner Choice | Frequency | Convert to degrees |
| Chicken | 11 | $11 \times 9=99^{\circ}$ |
| Pork | 8 | $8 \times 9=72^{\circ}$ |
| Lamb | 6 | $6 \times 9=54^{\circ}$ |
| Beef | 9 | $9 \times 9=81^{\circ}$ |
| Vegetarian | 6 | $6 \times 9=54^{\circ}$ |
| Total | 40 | $360^{\circ}$ |
| $\begin{aligned} & 15 \text { pupils }=180^{\circ} \\ & 180 \div 15=12 \\ & 12^{\circ}=1 \text { pupil } \\ & 72 \div 12=6 \text { pupils } \\ & 15-6=9 \end{aligned}$ <br> 9 fewer students chose ready salted over salt and vinegar. |  |  |
