

E-Safety Policy

Date written:	November 2016		
Date updated:	December 2020		

Context

Firs Primary School recognises that there is a duty to ensure that all pupils are able to make a valuable contribution to society and this is only possible to achieve if we ensure that pupils develop and apply their computing capability effectively and safely in their everyday lives.

The school is aware of its responsibilities in ensuring that technology usage within school is responsible, safe and secure.

This E-safety policy is written to reflect the importance of using technology safety and how by doing this, pupils and staff can be protected. The policy raises awareness of the safety issues by providing clear guidance on how to minimise risks and how to deal with any infringements of school policy. The policy also identifies how to introduce the concept of E-safety to pupils.

What is E-safety?

E-safety encompasses internet technologies and electronic communications. It highlights the need to educate pupils about the benefits and risks of using technology and how users can safeguard their online experience.

"E-safety may be described as the school's ability: to protect and educate pupils and staff in their technology" and "to have the appropriate mechanisms to intervene and support any incident where appropriate" *Ofsted*, 2014.

Technologies

ICT in the 21st Century has an all-encompassing role within the lives of children and adults. New technologies are enhancing communication and the sharing of information. Current and emerging technologies used in school and outside of school by children include:

- The internet
- Smart phones
- Digital cameras
- E-mail
- Instant messaging
- Web cams
- Blogs
- Podcasting
- Social networking sites
- Video broadcasting sites
- Chat rooms
- Gaming sites
- Game consoles

We understand that the technological world is changed at great speeds and that "new opportunities, challenges and risks are appearing all the time,"

(Teaching Online Safety in Schools, DfE, 2019). We therefore recognise that "it is important to focus on the underpinning knowledge and behaviours that can help pupils to navigate the online world safely and confidently regardless of the device, platform or app,"," (Teaching Online Safety in Schools, DfE, 2019).

Roles and Responsibilities

This policy is responsibility of the computing co-ordinator and Child Protection and Safeguarding Policy, Anti-Bullying Policy Mental-Health and Well-being Policy, Computing and PSHE Policy. The head teacher ensures that the policy is implemented and compliances with the policy will be monitored.

All teachers are responsible for promoting safe behaviours in their classrooms and following school procedures. Central to this is fostering a 'No Blame' culture so pupils feel able to report any bulling, abuse or inappropriate materials.

All staff should be familiar with the policy including:

- Safe use of e-mail;
- · Safe use of the internet including social media;
- Safe use of school network, equipment and data;
- Safe use of digital images and digital technologies, such as mobiles phones and digital cameras;
- Publication of pupil information/photographs and use of the website;
- Cyberbullying procedures
- Their role in providing E-Safety education for pupils.

The school includes E-Safety in their computing curriculum and ensure that every pupils has been educated about safe and responsible use. All classes teach e-safety discreetly for one half-term and revisit as necessary throughout the year.

"In the five schools where provision for e-safety was outstanding, all the staff, including members of the wider workforce, shared responsibility for it. Assemblies, tutorial time, personal, social, health and education lessons, and age appropriate curriculum for e-safety helped pupils to become safe and responsible users of new technologies" *Ofsted*, 2014.

Communications

How will the policy be introduced to pupils?

Many pupils are very familiar with the culture of new technologies. Pupils' perceptions of the risks are not always mature and hence; e-safety rules are explained or discussed in an age appropriate manner. Children will also take part in 'Safer Internet Day.'

To teach E-safety the school uses the slogan 'Zip it, Flag it Block it' which is outlined clearly by Child Alert.

More information regarding our E-Safety curriculum can be found at the end of this policy.

How will the policy be discussed with staff?

Staff will be given a copy of the e-safety policy to review and any training in safe and responsible internet use can be provided when required.

How will parents' support be enlisted?

Internet use in pupils' homes is an everyday activity. Unless parents are aware of the dangers, pupils may have unrestricted access to the internet. In the school reception, a display highlights key apps that are popular amongst children and the harms and risks involved, as well as the age restrictions. All of the information has been accessed from https://www.net-aware.org.uk/ in conjunction with O2 and NSPCC.

Any issues that have arisen within school which relates to internet usages will be handled sensitively by appropriate members of staff (class teacher, safeguarding lead, learning mentor, and/or headteacher) and parents will be advised accordingly. Any welfare concerns will be recorded and reported in line with the school's safeguarding policy. The e-safety policy will be also published onto the website.

How will complaints regarding E-Safety be handled?

The school will take all reasonable precautions to ensure E-safety. However owing to the international scaled and linked nature of internet content, the availability of mobile technologies and speed of change, it is not possible to guarantee that unsuitable material will never appear on a school computer or device. Neither the school nor the local authority can accept liability for material accessed, or any consequences of internet access.

Any complaint about staff misuses will be dealt with by a senior member of staff.

Any complaint about staff misuse must be referred to the head teacher.

Complaints of a child protection nature must be dealt with in accordance with the school safeguarding policy.

Complaints of cyberbullying are dealt with in accordance with our anti-bullying policy.

Managing the Internet Safely

The risks

The internet is an open communications channel, available to all. Anyone can send messages, discuss ideas and publish material with restriction. These features of the internet make it both an invaluable resources used by millions of people every day as well as a potential risk to young and vulnerable people, as much of the material on the internet is published for an adult audience and some is unsuitable for pupils.

In line with school policies that protect pupils from other dangers, there is a requirement to provide pupils with as safe an internet environment as possible and to teach pupils to be aware of and respond responsibly to any risk. This must be within a 'No Blame' supportive culture if pupils are to report abuse.

Technical and Infrastructure

This school maintains a filtered internet connectivity which ensures that any websites that are inappropriate are blocked immediately. Both children and staff are aware that the internet is filtered and can be monitored and understand that they must report any failure of the filtering. If any material is suspected to be illegal the school will immediately refer this to the appropriate authorities.

Education and Training

This school:

- Fosters a 'No Blame' environment that encourages pupils to tell a teacher/responsible adult immediately if they encounter any material that makes them feel uncomfortable;
- Ensures pupils know what to do if they find inappropriate web material
- Ensures pupils and staff know what to do if there is a cyber-bullying incident;
- Ensures all pupils know how to report abuse
- Teaches E-safety as part of the computing curriculum (at the end of the document) in line with the National Curriculum

Managing Internet Access- Email

Email is now an essential means of communication for staff in our schools and increasingly for pupils and homes.

This school does not publish personal emails of pupils or staff on the school website. Staff must use only their provided school emails when signing up to websites and sending e-mails relating to school.

Pupils may only use approved email accounts on the school systems and through the learning platform.

The learning platform flags up any abusive emails sent from pupil's accounts and these are reported to the teacher.

Pupils must immediately tell a teacher if they receive an offensive email.

Pupils must not reveal personal details of themselves or others in e-mail communication or arrange to meet anyone without specific permission.

E-mails sent to external organisations should be written carefully.

Managing Internet Access- Digital Images

The headteacher takes overall responsibility to ensure that the website content is accurate and the quality of presentation is maintained.

Photographs published on the school website / twitter account are only of those children who have had permission for this, and do not have full names attached.

Photographs taken by anyone in school are only taken by school equipment and can only be stored and accessed on schools devices.

Managing Equipment

The computer system/network is owned by the school and is made available to pupils to further their educations and to staff to enhance their professional activities including teaching, research, administration and management.

The school reserves the right to examine or delete any files that may be held on its computer system or to monitor any internet or email activity on the network.

To ensure the network is used safely this school:

- Has set-up the network with a shared work area for pupils and a separate one for staff. Staff and pupils are shown how to save work and access work from these areas;
- Provides pupils and staff with access to content and resources through the approved Learning Platform which staff and pupils access using individual user logins.

Managing Internet Access- Social Media

Parents and teachers need to be aware that the internet has emerging spaces and social networks which allow individuals to publish unmediated content. Social networking sits can connect people with similar or even quite different interests. Guests can be invited to view personal spaces and leave comments, over which there may be limited control. Pupils should be made aware of the age restrictions on the use of these websites and therefore schools should emphasise that the use of social media is inappropriate, but also be taught how accessible personal data can be and who it is shared to once it has been published.

School Social Media Accounts - Staff

YouTube

Firs Primary has a YouTube account linked to an unused email address within the school domain. The YouTube account can be accessed by any member of staff to upload videos to promote our school. One member of staff to take control of the account by being the recovery email. Before uploading videos to YouTube staff will inform parents in a written letter of their intentions and provide the opportunity for any parents to respond. Staff will also ensure that the only children to be shown in the videos are those with image publication consent. With the videos, no last names of the children will be published. All videos uploaded will be made public but the comments and ratings will be turned off.

Twitter & Facebook

The aim of the school twitter and Facebook account is to share learning experiences across the school and important information. The school twitter Facebook account will be linked to an unused email address within the school domain. The twitter account will be public to allow for re-tweets. The Twitter feed will also be published to the school website. The Twitter and Facebook account can be accessed by any member of staff to upload examples of work, tweets about their memorable experiences etc. When sending tweets or publishing posts, staff will ensure that no last names of children will be published. One member of staff has control of the accounts by being the recovery email. The computing lead, with the support of the safeguarding manager, will have responsibility in checking that the account is being used appropriately.

All parents will be informed of the Facebook and twitter account and be given the opportunity to withdraw from their child's photo or work being published on the account. Any withdrawals will be documented and shared with all members of staff. Parents will be encouraged to follow the school Twitter and/or Facebook account but will be asked that it is not used as a way of contacting the school with queries. Parents will also be reminded that it is not appropriate to attempt to find and follow/friend members of staff on social media. Staff are asked not to reply to any query tweets and not follow or associate their personal twitter account to the school twitter account.

Care must be taken to ensure any tweets to other twitter accounts must reflect well on the school, be professional and be with the vision of sharing and promoting educational experiences. This may be tweeting accounts of visitors into school, authors, book publishers, charities and school trip locations. Any inappropriate comments left on the twitter account should immediately be removed and reported to the headteacher.

Safeguarding Actions – Staff

If a member of staff commits an exceptionally serious act of gross misconduct they should be instantly suspended. Normally though, there will be an investigation before disciplinary action is taken for any alleged offence. As part of that the member of staff will be asked to explain their actions and these will be considered before any disciplinary action is taken.

In case of child pornography being found, the member of staff should be immediately suspending and the police should be called: anyone may report any inappropriate or potentially illegal activity or abuse towards a child online to the Child Exploitation and Online Protection (CEOP).

All staff will be asked to sign to say that they have read and understood the E-safety policy.

Teaching of E-Safety

Our E-Safety curriculum ensures that we are teaching the "knowledge and behaviours that can help pupils to navigate the online world safety and confidently regardless of the device platform or app," (Teaching Online Safety in School, DFE, June 2019). We aim to teach our pupils to have a positive, yet sensible attitude towards the online world by ensuring that they have the "knowledge needed to make the best use of the internet and technology in a safe, considered and respectful way," (Teaching Online Safety in School, DFE, June 2019). We also place a large emphasis on children understanding how they must behave online, not just the behaviour of others.

Meeting the needs of pupils

We also ensure that we tailor out teaching to "support to the specific needs of their pupils," (Teaching Online Safety in School, DFE, June 2019). This links to our Safeguarding Policy, Keeping Children Safe in Education and staff using their knowledge of pupils' background, experiences, ability, culture, language and any safeguarding concerns (including knowing which pupils are more likely to be susceptible to online harm e.g. SEND) when planning and adjusting lessons. Although the objectives below and planned out in to progressive key stage objectives, it is recognised that for some of our pupils it may be appropriate to re-visit objectives from previous key stages. Our I-Vengers (implemented 2020/2021) are also used to support pupils' from a pupil's perspective. In addition to this, our learning mentor and/or outside agencies (such as Safe 'n' Sound) work with identified pupils to target specific needs.

Making our pupils feel safe

During lessons, children are in a safe environment where they are encouraged to show our FIRSY value of 'Respectful.' Children are encouraged to discuss ideas with each other. If children are feeling worried or wish to share anything with a member of staff, the whole school approach applies: put it in the classroom worry box; speak to the class teacher; or speak to a member of the safeguarding team.

Additional Opportunities

As well as teaching our E-Safety curriculum, every year our school takes part in Safer Internet Day and Anti-Bullying week: each class completes a range of activities that are suitable for their age group. We may also have visitors attend school to complete age and ability appropriate workshops such as Konflux Education. https://www.konfluxtheatre.co.uk/topics/internet-safety

In line with our Safeguarding policy we also have external visits from Safe 'n' Sound and the NSPCC, which may also cover aspects of online safety. https://www.nspcc.org.uk/keeping-children-safe/our-services/working-with-schools/ https://www.safeandsoundgroup.org.uk/

Our Curriculum

E-Safety at Firs is primarily taught discreetly for 1 half term every year, with revisiting as required by the needs of the pupils or as issues arise. Our E-Safety curriculum has been designed in line with guidance and other whole school curriculums: National Curriculum; PSHE (SCARF) curriculum; Derby Diocese Academy Curriculum Progression; Teaching Online Safety in School (DFE); and Education for a Connected World (UK Council for Internet Safety).

The curriculum has been designed to cover these strands of E-Safety identified from Teaching Online Safety in School and Education for a Connected World (UK Council for Internet Safety):

- Online Relationships
- Self Identity
- Online Reputation
- Online Bullying
- Managing Online Information
- Health, well-being and lifestyle
- Copyright and ownership

The curriculum below is separated into key stages (KS1, LKS2, UKS2) and then split in to two progressive sections. These sections may be used when planning progression through lessons or through differentiation when planning lessons and determining outcomes for children. The objectives have been taken from the published document, Education for a Connected World (UK Council for Internet Safety).

The success criteria below does not determine how many lessons are required to cover each criteria: multiple criteria may be addressed within one lesson, or one statement may take multiple lessons to teach successfully. Each strand has been planned in to the two-year curriculum cycle at Firs. Every strand will not be covered every year, but every child who goes through their education at Firs will receive teaching in all of the strands by the end of Year 6. However, at any point in the school year, if a class teacher identifies the need for a particular strand to be addressed for individuals or their class, this may be planned in as an additional teaching opportunity.

National Curriculum

KS1 Objective: use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.

KS2 Objective: use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact

	EYFS (4+)	Key Stage 1		Lower Key Stage 2		Upper Key Stage 2	
Self-Identity	I can recognise, online or offline, that anyone can say no/please stop/ I'll tell/ I'll ask to somebody who makes them feel sad, uncomfortable, embarrassed or upset	I can recognise that there may be people online who could make someone feel sad, embarrassed or upset If something happens that makes me feel sad, worried, uncomfortable or frightened I can give examples of when and how to speak to an adult I can trust and how they can help.	people may look and act differently online and offline	I can explain what is meant by the term identity I can explain how people can represent themselves in different ways online I can explain ways in which someone might change their identify depending on what they are doing online (e.g. gaming; using an avatar; social media) and why	I can explain how my online identity can be different to by offline identity I can describe positive ways for someone to interact with others online and understand how this will positively impact on how others perceive them I can explain that others online can pretend to be someone else including by friends, and can suggest reasons why they might do this	I can explain how identity online can be copied, modified or altered. I can demonstrate how to make responsible choices about having an online identity, depending on context. I can explain how identity to context.	I can identify and critically evaluate online content relating to gender, race, religion, disability, culture and other groups, and explain why it is important to challenge and reject inappropriate representations online. I can describe issues online that could make anyone feel sad, worried, uncomfortable or frightened. I know and can give examples of how to get help, both on and offline. I can explain the importance of asking until I get the help needed.
Online Reputation	I can identify ways that I can put information on the internet Additional guidance	I can recognise that information can stay online and could be copied I can describe what information I should not put online without asking a trusted adult first I can recognise that information can stay online what information I should not put online without asking a trusted adult first I can recognise that information can stay online what information I should not put online what information I should not put online without asking a trusted adult first I can recognise that information can stay online and could be copied.	information put online about someone can last for a long time I can describe how anyone's online information could be seen by others	I can explain how to search for information about others online I can give examples of what anyone may or may not be willing to share about themselves online. I can explain the need to be careful before sharing anything personal I can explain who someone can ask if they are unsure about putting something online	I can describe how to find out information about others by searching online I can explain ways that some of the information about anyone online could have been created copied or shared by others	I can search for information about an individual online and summarise the information found I can describe ways that information about anyone online can be used by others to make judgements about an individual, and why these may be incorrect.	I can explain the ways in which anyone can develop a positive online reputation I can explain strategies anyone can use to protect their 'digital personality' and online reputation, including degrees of anonymity.

Additional guidance

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/811796/Teaching_online_safety_in_school.pdf

Schools can help pupils to identify and manage risk by:

- discussing the ways in which someone may put themselves at risk online,
- discussing risks posed by another person's online behaviour,
- discussing when risk taking can be positive and negative,
- discussing "online reputation" and the positive and negative aspects of an online digital footprint. This could include longer-term considerations, i.e how past online behaviours could impact on their future, when applying for a place at university or a job for example, discussing the risks vs the benefits of sharing information online and how to make a judgement about when and how to share and who to share with
- asking questions such as what might happen if I post something online? Who will see it? Who might they send it to?

Additional guidance

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/811796/Teaching_online_safety_in_school.pdf

Schools can help pupils to recognise acceptable and unacceptable behaviour by:

- looking at why people behave differently online, for example how anonymity (you do not know me) and invisibility (you cannot see me) affect what people do,
- looking at how online emotions can be intensified resulting in mob mentality,
- teaching techniques (relevant on and offline) to defuse or calm arguments, for example a disagreement with friends, and disengage from unwanted contact or content online,

trusted adult before clicking 'yes' 'agree' or 'accept' online

• considering unacceptable online behaviours often passed off as so-called social norms or just banter. For example, negative language that can be used, and in some cases is often expected, as part of online gaming and the acceptance of misogynistic, homophobic and racist language that would never be tolerated offline.

Additional Guidance

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/811796/Teaching_online_safety_in_school.pdf

Schools can help pupils by:

- helping them to identify who trusted adults are,
- looking at the different ways to access support from the school, police, the National Crime Agency's Click CEOP reporting service for children and 3rd sector organisations such as Childline and Internet Watch Foundation. This should link to wider school policies and processes around reporting of safeguarding and child protection incidents and concerns to school staff (see Keeping Children Safe in Education)
 helping them to understand that various platforms and apps will have ways in which inappropriate contact or content can be reported.

believe /a joke. I know how to get help from a trusted adult if we see content that makes us feel sad, uncomfortable worried or frightened. I can explain the difference between things that are imaginary, 'made up' or 'make believe' and things that are 'true' or 'real'. I can explain why some information I find online may not be real or true. I can explain why some and things that are 'true' or 'real'. I can explain why some information I find online may not be real or true. I can explain the difference between a 'belief, an 'opinion' and a'belief, an 'opinion'	I can talk about how to use the internet as a way of finding information online. I can identify devices I could use to access information on the internet.	I can give simple examples of how to find information using digital technologies, e.g. search engines, voice activated searching). I know / understand that we can encounter a range of things online including	I can use simple keywords in search engines. I can demonstrate how to navigate a simple webpage to get to information I need (e.g. home, forward, back buttons; links, tabs and sections).	I can demonstrate how to use key phrases in search engines to gather accurate information online. I can explain what autocomplete is and how to choose the best suggestion.	I can analyse information to make a judgement about probable accuracy and I understand why it is important to make my own decisions regarding content and that my decisions are respected by others.
I can explain why some information I find online may not be real or true. I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). I can describe and demonstrate how we can get help from a trusted adult if we see content that makes us feel sad, uncomfortable worried or frightened. I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). I can explain offers; in-app purchases, pop-ups) and can recognise some of these when they appear online. I can explain of the same opinions or beliefs online do not make those opinions or beliefs true. I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). I can explain why lots of people sharing the same opinions or beliefs online do not make those opinions or beliefs true.	Managi	things we like and don't like as well as things which are real or make believe / a joke. I know how to get help from a trusted adult if we see content that makes us feel sad, uncomfortable	I can explain what voice activated searching is and how it might be used, and know it is not a real person (e.g. Alexa, Google Now, Siri). I can explain the difference between things that are imaginary, 'made up' or 'make believe' and things that are 'true' or	I can explain how the internet can be used to sell and buy things. I can explain the difference between a 'belief', an 'opinion' and a 'fact. and can give examples of how and where they might be shared online, e.g. in videos, memes, posts,	search for information within a wide group of technologies and make a judgement about the probable accuracy (e.g. social media, image sites, video sites). I can describe some of the methods used to encourage people to buy
get help from a trusted adult if we see content that makes us feel sad, uncomfortable worried or frightened. get help from a trusted opinions or beliefs online do not make those opinions or beliefs true.			I can explain why some information I find online	I can explain that not all opinions shared may be accepted as true or fair by others (e.g. monsters under the bed). 				get help from a trusted adult if we see content that makes us feel sad, uncomfortable worried or	opinions or beliefs online do not make those opinions or beliefs true. I can explain that

photographs and put them online to pretend something is true when it

- explain the benefits limitations of using ent types of search ologies e.g. voiceation search engine. I explain how some nology can limit the mation I aim ented with e.g. voiceated searching giving result.
- an explain what is by 'being tical'; l can give ples of when and it is important to be tical'.
- an evaluate digital ent and can explain to make choices it what is trustworthy differentiating een adverts and ch results.
- explain key concepts iding: information, ws, fact, opinion, f, validity, reliability evidence.
- n identify ways the net can draw us to mation for different idas, e.g. website cations, pop-ups, eted ads.
- n describe ways of ifying when online has been mercially sponsored boosted, (e.g. by nercial companies or vloggers, content creators, influencers).
- I can explain what is meant by the term 'stereotype', 'stereotypes' are amplified and reinforced online, and why accepting 'stereotypes' may influence how people think about others.
- I can describe how fake news may someone's emotions and behaviour, and explain why this may be harmful. I can explain what is meant by a 'hoax'. I can explain why someone

- I can explain how search engines work and how results are selected and ranked.
- I can explain how to use search technologies effectively.
- I can describe how some online information can be opinion and can offer examples.
- I can explain how and why some people present 'opinions' as 'facts': why the popularity of an opinion or the personalities of those promoting it does not necessarily make it true, fair or perhaps even legal.
- I can define the terms 'influence', 'manipulation' and 'persuasion' and explain how someone might encounter these online (e.g. advertising and 'ad targeting' and targeting for fake news).
- I understand the concept persuasive design and how it can be used to influences peoples' choices.
- I can demonstrate how to analyse and evaluate the validity of 'facts' and information and I can explain why using these strategies important.
- I can explain how companies and news providers target people with

						would need to think carefully before they share.	online news stories they are more likely to engage with and how to recognise this. I can describe the difference between online misinformation and dis-information. I can explain why information that is on a large number of sites may still be inaccurate or untrue. I can assess how this might happen (e.g. the sharing of misinformation). I can identify, flag and report inappropriate content
Health, well-being and lifestyle	I can identify rules that help keep us safe and healthy in and beyond the home when using technology. I can give some simple examples of these rules.	I can explain rules to keep myself safe when using technology both in and beyond the home.	I can explain simple guidance for using technology in different environments and settings e.g. accessing online technologies in public places and the home environment. I can say how those rules / guides can help anyone accessing online technologies.	I can explain why spending too much time using technology can sometimes have a negative impact on anyone, e.g. mood, sleep, body, relationships; I can give some examples of both positive and to the cativities where it is easy to spend a lot of time engaged (e.g. doing homework, games, films, videos). I can explain why some online activities have age restrictions, why it is important to follow them and know who I can talk to if others pressure me to watch or do something online that makes me feel uncomfortable (e.g. age restricted gaming or web sites).	I can explain how using technology can be a distraction from other things, in both a positive and negative way. I can identify times or situations when someone may need to limit the amount of time they use technology e.g. I can suggest strategies to help with limiting this time.	I can describe ways technology can affect health and well-being both positively (e.g. mindfulness apps) and negatively. I can describe some strategies, tips or advice to promote health and wellbeing with regards to technology. I recognise the benefits and risks of accessing information about health and well-being online and how we should balance this with talking to trusted adults and professionals. I can explain how and why some apps and games may request or take payment for additional content (e.g. in-app purchases, lootboxes) and explain the importance of seeking permission from a trusted adult before purchasing.	I can describe common systems that regulate agerelated content (e.g. PEGI, BBFC, parental warnings) and describe their purpose. I recognise and can discuss the pressures that technology can place on someone and how / when they could manage this.

Additional Guidance https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/811796/Teaching_online_safety_in_school.pdf Schools can help pupils to recognise: • online content which tries to make people believe something false is true and/or mislead (misinformation and disinformation), • techniques that companies use to persuade people to buy something, ways in which games and social media companies try to keep users online longer (persuasive/sticky design) criminal activities such as grooming. I can identify some simple I can explain that I can explain how I can describe simple I can describe strategies I can explain what a I can describe examples of my personal passwords are used to passwords can be used to strategies for creating and for keeping personal strong password is and effective ways information (e.g. name, protect information, protect information, keeping passwords information private, demonstrate how to people can address, birthday, age, accounts and devices. accounts and devices. private. depending on context. create one. manage and location). I can recognise more I can explain and give I can explain that internet I can explain how many passwords (e.g. I can give reasons why I can describe who would detailed examples of examples of what is someone should only use is never fully private free apps or services may storina them be trustworthy to share information that meant by 'private' and share information with and is monitored, e.g. read and share private securely or saving this information with; I can personal to someone (e.g. 'keeping things private' people they choose to and information (e.g. friends, them in the adult supervision. explain why they are where someone lives and can trust. I can explain contacts, likes, images, browser). I can describe and explain I can describe how some goes to school, family I can explain what trusted. some rules for keeping that if they are not sure or online services may seek videos, voice, messages, names). feel pressured then they geolocation) with others. to do if a password personal information consent to should tell a trusted adult. is shared, lost or I can explain why it is private (e.g. creating and information about me: I I can explain what app stolen. important to always ask a protecting passwords). I can describe how know how to respond permissions are and can trusted adult before I can explain how some connected devices can appropriately and who I give some examples. I can describe how can ask if I am not sure. and why people sharing any personal people may have devices and should keep their information online. in their homes connected anvone's information with I know what the digital age software and apps belonging to myself or others. to the internet and give of consent is and the up to date, e.g. others. examples (e.g. lights, impact this has on online auto updates. fridges, toys, televisions). services asking I can describe consent. simple ways to increase privacy apps and services that provide privacy settinas. I can describe ways in which some online content targets people to gain money information illegally; I can describe strategies to help me identify such content (e.g. scams, phishing). I know that online services have terms and conditions that govern their use.

I know that work I belongs to me. I can name my wo that others know belongs to me. Key Questions:	create using technology k so belongs to me.	content on the internet may belong to other people I can describe why other people's work belongs to them.	I can explain why copying someone else's work from the internet without permission isn't fair and can explain what problems this might cause.	When searching on the internet for content to use, I can explain why I need to consider who owns it and whether I have the right to reuse it. I can give some simple examples of content which I must not use without permission from the owner, e.g. videos, music, images.	when it is acceptable to use the work of others. I can give examples of content that is permitted to be reused and know how this content can be found online.	I can demonstrate the use of search tools to find and access online content which can be reused by others. I can demonstrate how to make references to and acknowledge sources I have used from the internet.

Remote Learning Addendum to the E-Safety Policy

We have devised some guidance that reflects the changed circumstances brought about by Covid-19 and the significant increase in the use of online technology to facilitate teaching and learning. This addendum does not introduce any new concepts, rather, it specifically outlines the various applications used for the delivery of online classes remotely.

This guidance operates alongside all of our existing policies which can be viewed on our school website. We continue to expect all staff to abide by the highest professional standards when working directly and remotely with students and our Safeguarding Policy and Staff Code of Conduct still currently apply. Students must comply with this additional guidance and we request that parents/carers ensure that their child fully understands and agrees to follow these guidelines.

Introduction

This document sets out the guidance in respect to the use of technology to facilitate remote teaching and learning, hereafter referred to as "Remote Learning." This addendum will be kept under review as circumstances dictate.

Scope of this Guidance

This guidance covers any aspect of student remote learning as used by staff.

The list of applications that will be used for remote learning will primarily be:

- MyOn
- Zoom
- ClassDojo
- MyMaths
- School Website
- YouTube

Remote Learning Approach

Remote Learning will incorporate a number of different approaches including the use of live classes either filmed or audio only and or shared workspaces. All teachers will aim to provide the best experience for students that provides feedback and interaction but will adopt different approaches (live teaching, pre-recorded lessons etc.). In all cases our primary aim is to cover the required curriculum for all subject areas. Students should get in touch with their teacher right away if they are having difficulty with any aspect of their learning or contact the school office if they are struggling to access the remote learning.

Responsibilities while engaging in Remote Learning

For staff:

Teachers have overall control of the online interaction of their class.

- Any student that disrupts the lesson and does not respond positively to the teacher's
 instructions will be removed in order to allow those who wish to partake a fair chance to
 do so. A student who repeatedly disrupts learning may receive a temporary ban from all
 online access.
- In the event of a bubble closure, teachers will do their utmost to be available during school learning hours this may be via a zoom video or through class dojo.
- In the event of single student isolation, teachers will do their utmost to provide feedback to pupils and answer any questions either before or after school.
- Staff will remind students of the expectations in terms of behaviour during live sessions and the conduct expected of them.
- Where possible, there will be two members of staff online during live teaching sessions, or the session will be recorded and stored following the session.

For students:

- You must always be polite and respectful to your teachers and fellow students.
- You are not to film (by any means) or forward any content within the lesson
- You understand that all your online activity is monitored. This includes anything on Dojo and the learning platform, and whether you are checking regularly for assigned work.

For parents/carers:

- You should ensure that your child is checking in regularly for assigned work.
- When your child is watching a live lesson, you should try to ensure your child is in an area of the house that is quiet and free from distractions.
- We would insist that students do not try to film the session using any device.
- A live online lesson must be treated like a regular school lesson and only viewed by those who are invited to attend.

This guidance is in line with the Positive Behaviour Policy Addendum

https://firsprimary.derby.sch.uk/wp-content/uploads/2020/09/Positive-Behaviour-Policy-COVID-19-Sept-2020.pdf

Live Online Classes

Teachers may deliver some of the lesson "live" using Zoom. This will use varying combinations of audio, video, virtual whiteboards and screencasts.

In the use of Zoom:

- Students must always follow the direction of their teacher just as in the classroom.
- Students are not to film the session using any device.
- Students are not to turn on their microphone unless the teacher invites them to do so.
 All microphones should be on mute when a person is not speaking to avoid distracting background noise being broadcast to everyone.
- A live lesson is intended for the allocated class only. The teacher will decide who should receive the invite through ClassDojo. Only those invited by the teacher have permission to view the lesson.
- Staff may pre-record a lesson prior to sharing it with pupils, or record a live lesson.

Online safety

During the current situation, student screen time will inevitably be increased significantly, both for home learning and personal use. The school is committed to keeping children safe online and to ensuring positive online interaction between teachers, parents and pupils. Some work should also be set which is not computer-based, to allow pupils learning time away from screens.

Pupils will be given guidance in line with the DfE guidance on 'Teaching about online safety', June 2019. Pupils will be taught:

- Appropriate online behaviour
- How to evaluate what they see online
- How to identify online risks
- How to recognise techniques used for persuasion
- How and when to seek support

Parents should be aware of:

- The importance of remaining in control of electronic devices at home and remaining in earshot when children are in contact with teachers.
- What their children are being asked to do online during this period of remote learning.
- The sites that the children will be asked to access.
- Filters that might be appropriate on home computers if online lessons are to be effective.
- Who their child is going to be interacting with online.
- How to report concerns to the school.
- Where to seek support to help them to keep their children safe online.
- The following websites offer support to parents and carers regarding e-safety:
 - Internet matters https://www.internetmatters.org
 - London Grid for Learning https://www.lgfl.net/default.aspx
 - Net-aware https://www.net-aware.org.uk
 - Thinkuknow https://www.thinkuknow.co.uk/
 - Parent Info https://parentinfo.org/
 - UK Safer Internet Centre https://www.saferinternet.org.uk

Staff should:

- Reinforce e-safety messages during lessons and when setting homework that requires access to the Internet.
- Encourage students to be critically aware of the content they access on-line and be guided to validate the accuracy of information, acknowledge the source of information used, avoid plagiarism and respect copyright.
- Be alert to possible peer-on-peer abuse. This could occur during online collaborative work on a Zoom session. Teachers must control these sessions and report concerns. No additional unsupervised online collaborative work should be encouraged.
- Check what is visible on screen to the pupil, so that nothing inappropriately personal is visible (e.g. personal item, painting, poster)
- Make sure that there is never a possibility of strangers having access to the screen.
- Check thoroughly any pictures or video-clips that we want to share with pupils

Report immediately any concerns about online safety of pupils to the DSL or one of the
deputies. Any such concerns should be dealt with as per our Safeguarding policy and
where appropriate referrals should still be made to children's social care and as required
by the police.

Staff should be aware of the UK Safer Internet Centre's professional online safety helpline, which provides support with any online safety issues which they may face:

https://www.saferinternet.org.uk/helpline/professional

Staff can also signpost children to age appropriate practical support from:

- Childline for support
- UK Safer Internet Centre to report and remove harmful online content
- CEOP for advice on making a report about online abuse
