

Steps to Success

Lockdown	
Date	
Subject/s	Maths
Learning Objective 	To solve equations using algebra

SA 	TA 

Success Criteria 	I know letters represent numbers		
	I can substitute letters for values		
	I can work out what a letter represents by doing the inverse		
Support	Independent	Adult Support ()	Group Work

Pre-task

Substitute into the following expressions when,

$$w = 10 \quad x = \frac{1}{4} \quad y = 2.5$$

- $3y$
- $12 + 8.8w$
- wx
- $x \times (w + 2y)$

If $2x + 9 = 49$ What is x ?

$a + b = 14$	What could a and b be?
$a + b = 21$	What could a and b be?
$a - b = 12$	$a = 13$ $a = 14$ $a = 15$
$a - b = 23$	$a = 24$ $a = 25$ $a = 26$
$15 + a = b$	$a = 1$ $a = 2$ $a = 3$
$a - 13 = b$	$a = 14$ $a = 15$ $a = 16$
$27 - a = b$	$a = 1$ $a = 2$ $a = 3$
$3a - b = 12$	$a = 5$ $a = 6$ $a = 7$
$6a + b = 25$	$a = 1$ $a = 2$ $a = 3$
$2a - b = 10$	$a = 6$ $a = 7$ $a = 8$
$3a - b = 17$	$a = 6$ $a = 7$ $a = 8$

Problem Solving and Reasoning

Use it!

Here are two equations.

$$p = 2a + 5$$

$$c = 10 - p$$

Find the value of c when $a = 10$

Explain it!

$$x = 2c + 6$$

Joe says,

$x = 12$ because c must be equal to 3 because it's the 3rd letter in the alphabet

Is Joe correct?

Explain it!

Derek says,

When $c = 5$ the answer is 31

Is Derek correct?

Use it!

- Hannah is 8 years old
- Jack is 13 years old
- Grandma is $x + 12$ years old.
- The sum of their ages is 100

Form and solve an equation to work out how old Grandma is.

Answers

$$c = -15$$

No Joe is incorrect.
 c could have any
value.

No Derek is
incorrect, he has
just put the 2 and
5 together to make
25 instead of
multiplying them.

$$\text{Hannah} + \text{Jack} = 21$$

$$100 - 21 = 79 - 12 = 67$$

Grandma is 67

Further Challenge

The coloured shapes stand for eleven of the numbers from 0 to 12. Each shape is a different number.

Can you work out what they are from the multiplications below?

 x  x  = 	 x  = 
 x  = 	 x  = 
 x  = 	 x  = 
 x  = 	 x  = 
 x  = 	 x  = 
 x  = 	 x  =
