Subject/s	<u>Maths</u>
Learning Objective 	To convert units of weight

		SA 	TA 
Success Criteria 	I know there are 1000g in 1kg I can multiply and divide by 1000 using or visualising a place value grid		
Support	Independent	Adult Support ()	Group Work

Pre-task:

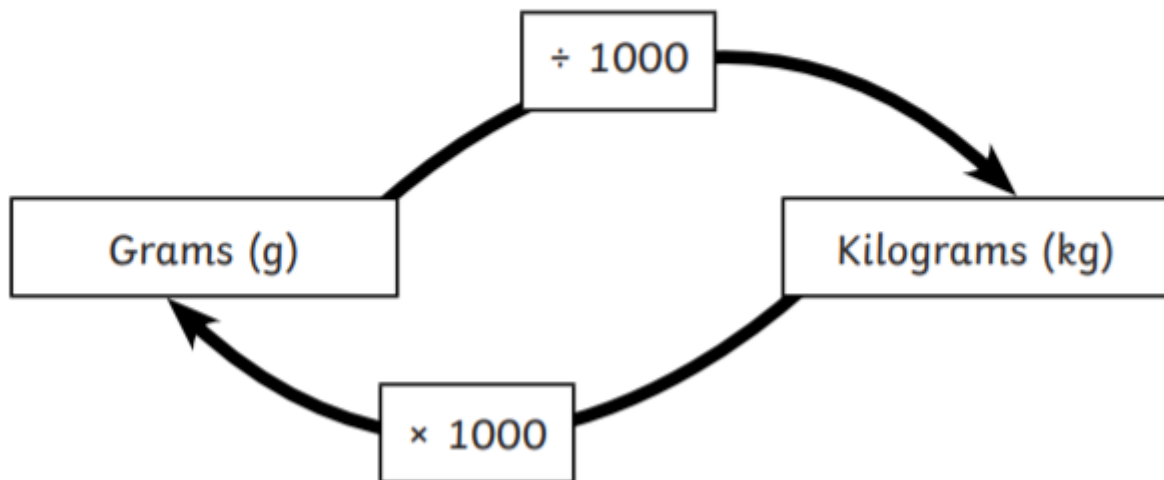

Convert these units:

178kg = _____g

2.5kg = _____g

_____kg = 5695g

_____kg = 259g

Mass

Problem Solving and Reasoning

Prove it!

True or false?

If you convert any amount of grams to kilograms, then it will never have a digit in the ones column. E.g. $76\text{ g} = 0.076\text{ kg}$

Use it!

A parcel weighs 439 grams. How much would 27 parcels weigh? Give your answer in kilograms.

Use it!

To bake buns for a party, Keeley used these ingredients:

- 600 g caster sugar
- 0.6 kg butter
- 18 eggs (792 g)
- $\frac{3}{4}$ kg self-raising flour
- 10 g baking powder

What is the weight of the unbaked products?
Give your answer in kilograms.

Use it!

Each nail weight 3.85 g

There are 24 nails in a packet.

What would the total mass of 60 packets be in kilograms?

How many packets would you need if you wanted $\frac{1}{2}$ kg of nails?

How many grams of nails would be left over?

Use it!

Laura buys 3,500 grams of potatoes and 1,500 grams of carrots.

She pays with a £5 note.
How much change does she get?

Show all of your working out

Answers

False because
1,001 g would be
1.001 kg etc.

11.853kg

$$439 \times 27 = 11853$$

$$11853 \text{ divided by } 1000 = 11.853$$

2.752kg

$$600 + 600 + 792 + 750 + 10 = 2752$$

5.544 kg

6 packets (554.4
g)

55.4 g left over

Laura receives

8 p change.

$$78 \times 3 = 234 + 39 \text{ (1/2 } 78) = 273\text{p}$$

(£2.73)

$$1.46 \text{ divided by } 2 = 0.73$$

$$1.46 + 0.73 = £2.19$$

$$£2.73 + £2.19 = £4.92$$

$$£5.00 - £4.92 = 0.08$$

Further Challenge

What's My Weight?

The picture shows four equal weights on one side of the scale and an apple on the other side.

What can you say that is true about the apple and the weights?

If the apple weighs 180g , how heavy must one weight be?

If the apple weighed 375g , how heavy would one weight be?

If the apple was a giant one and weighed a full kilo and the weights were each 250g , what would the scale look like? How do you know? Can you prove it?

Further Challenge 2

Baby's Weight

Weighing the baby at the clinic was a problem. The baby would not keep still and caused the scales to wobble. So I held the baby and stood on the scales while the nurse read off 78kg . Then the nurse held the baby while I read off 69kg . Finally I held the nurse while the baby read off 137kg . What is the combined weight of all three (in kg)?
