

Fluency

Complete these questions.

1. $\frac{3}{5} \times 150 =$

2. = $100 - 54 \div 6$

3. $80.5 - 5.05 =$

4. $35\,877 + 6685 =$

5. $383.49 - 74.84 =$

6. $15\% \times 340 =$

Problem Solving

Each shape represents a number.
What is the value of each shape?

$\triangle + \triangle + \triangle = 59$
 $\triangle + \triangle + \triangle = 105$

Reasoning

$12\% \text{ of } 1150 = 138$
Prove it!

Fluency

Complete these questions.

1. $\frac{3}{5} \times 150 = 90$

2. $\boxed{91} = 100 - 54 \div 6$

3. $80.5 - 5.05 = 75.45$

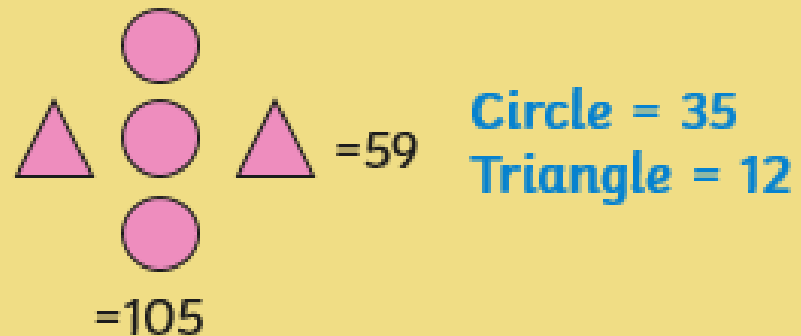

4. $35\ 877 + 6685 = 42\ 562$

5. $383.49 - 74.84 = 308.65$

6. $15\% \times 340 = 51$

Problem Solving

Each shape represents a number.
What is the value of each shape?

Reasoning

12% of 1150 = 138
Prove it!
